

Watch Ads System

You can write your ads codes by opening game over component under **RaceManager** gameobject:

Now you can write your ads code here:

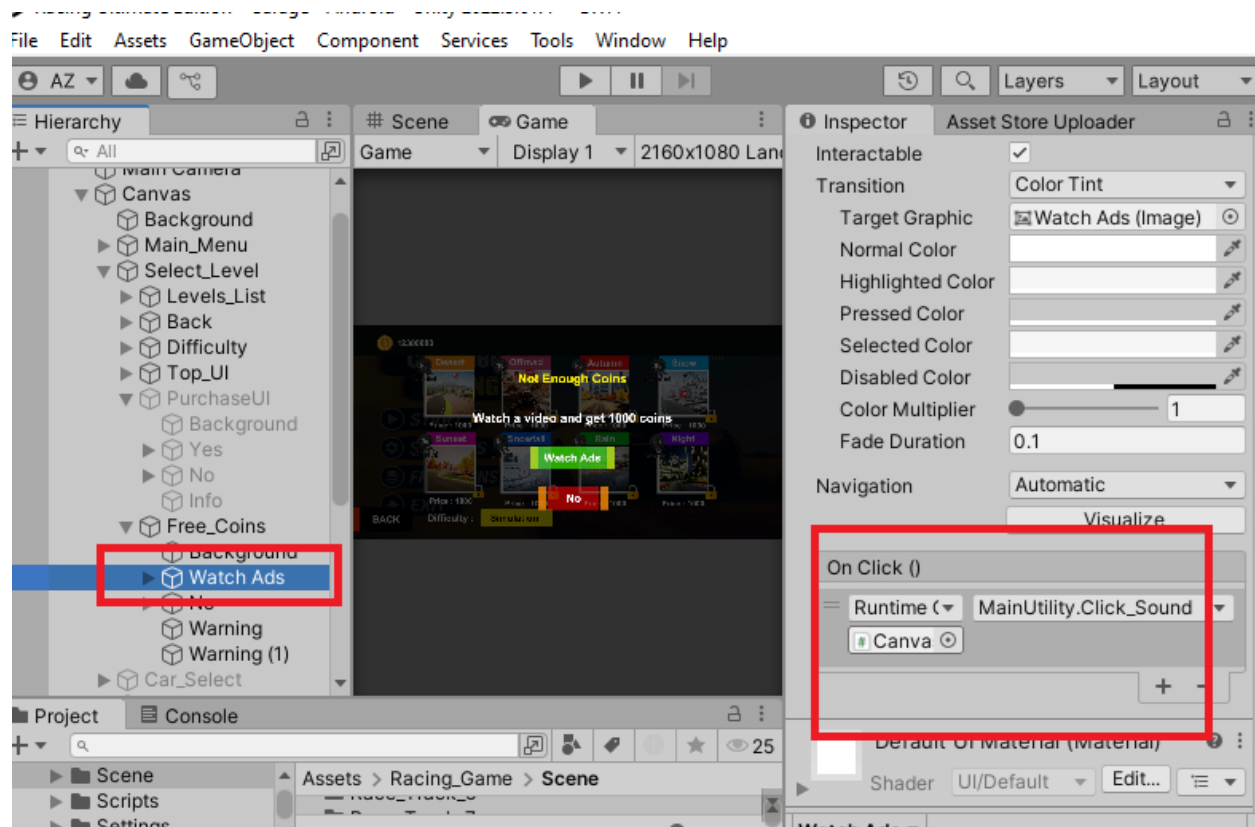

The screenshot shows a Unity C# script editor with the following code in the `GameOver.cs` file:

```
50     foreach(GameObject aaa in raceUI)
51     {
52         aaa.SetActive(false);
53
54         mobileControls.SetActive(false);
55         Time.timeScale = 0;
56         AudioListener.volume = 0;
57     }
58
59     public void Watch_Ad()
60     {
61         /* RewardedVids.Instance.ShowRewardedADGameOver();
62         watchAD.SetActive(false);
63         resume.SetActive(true);
64         FindFirstObjectByType<Car_Health>().Refill_Health();*/
65     }
66
67     public void Resume()
68     {
69         watchAD.SetActive(true);
70         FindFirstObjectByType<Car_Health>().Refill_Health();
71
72         FindFirstObjectByType<Pause_Menu>().canPause = true;
73         AudioListener.volume = 1f;
```

The `Watch_Ad()` method is highlighted with a red box. The code includes comments for showing a rewarded advertisement and setting up the game state after the ad.
